

<b>Topic number</b>	<b>Author(s)</b>	<b>Title</b>	<b>Program number</b>
1	A. Bekstein, J. de Urquijo, F. J. Gordillo-Vázquez, G. Ruiz-Vargas	<b>Influence of pressure on the formation of negative ions in water vapour</b>	P3.1.1
	M. Danko, J. Országh, A. Ribar, Š. Matejčík	<b>Electron Induced Emission of Methane</b>	P3.1.2
	A. Bekstein, C. Villavicencio, J. Figueroa, J. de Urquijo	<b>Electron detachment in N<sub>2</sub>O</b>	P3.1.3
	Charles Klett, Zixian Jia, Sylvain Touchard, Arlette Vega, Michael Redolfi, Khaled Hassouni and Xavier Duten	<b>Oxidation of an acetaldehyde/acetylene equimolar mixture by an atmospheric non-thermal plasma discharge</b>	P3.1.4
	Jeong Ryeol Choi, Kyu Hwang Yeon, Mustapha Maamache, Salah Menouar, Samira Lakehal	<b>Quantum analysis of a modified Caldirola-Kanai oscillator model for electromagnetic fields in time-varying plasma</b>	P3.1.5
	E. A. D. Carbone, J. M. Palomares, S. Hübner, J.J.A.M. van der Mullen	<b>Unravelling in situ atomic and molecular kinetics by LCIF and Thomson scattering</b>	P3.1.6
	T.T.J. Clevis, S. Nijdam, U. Ebert	<b>Slow decay of radiation after a pulsed streamer discharge in pure nitrogen</b>	P3.1.7
	I. Zymak, M. Hejduk, D. Mulin, R. Plašil, D. Gerlich and J. Glosík	<b>Ternary association of H<sup>+</sup> ions with H<sub>2</sub>; Experiments with normal and para-enriched hydrogen at 11 K</b>	P3.1.8
	Mario Lino Da Silva, Dzmitry Tsyhanou, Vasco Guerra and Jorge Loureiro	<b>An Improved Kinetic Model for Highly Ionized N<sub>2</sub>-CH<sub>4</sub> Shocked Flows</b>	P3.1.9
	W.Kamiński, J.Keşik, P.Warda	<b>Influence of neon and argon admixtures on laser generation conditions of krypton ion lasers</b>	P3.1.10
	Ivan Mancev and Nanad Milojevic	<b>Charge exchange in fast Li<sup>3+</sup> - He collision</b>	P3.1.11
4	S. Welzel, S.A. Starostin, H. de Vries, M.C.M. van de Sanden, R. Engeln	<b>Gas phase studies during roll-to-roll processing of polymers in air-like atmospheric pressure DBDs</b>	P3.4.1
	E. C. Neyts, A. Bogaerts	<b>Understanding plasma growth of SWNTs: Effect of electric field and ion bombardment</b>	P3.4.3
	Francisco Dias, Neli Bundaleska, Rafael Saavedra, Elena Tatarova, Carlos Ferreira and Jayr Amorim	<b>Pretreatment of sugarcane biomass by atmospheric pressure microwave plasmas</b>	P3.4.5
	Johannes Berndt, Eva Kovacevic, Hamid Acid, Thomas Strunskus and Laifa Boufendi	<b>Low temperature plasmas as a source for nanostructured organic surfaces with controlled wettability</b>	P3.4.7
	Brankica Sikimić, Igor Denysenko, Ilija Stefanović, Jörg Winter	<b>The effect of the thin film at the electrodes on the sheath size and ion flux in an argon plasma afterglow</b>	P3.4.8
	Eva Kovacevic, Johannes Berndt, Hamid Acid and Laifa Boufendi	<b>Low temperature plasma deposition of thin films/nanoparticles from poly(methyl methacrylate)</b>	P3.4.9

	Naoki Nakashima, Moe Shibata, Toshihiro Takamatsu, Ryota Sasaki, Hidekazu Miyahara, and Akitoshi Okino	<b>High-Speed Reduction of Oxide Film and Surface Hydrophilization using Atmospheric Multi-Gas Plasma Jet</b>	P3.4.10
	D. Marinov, O. Guaitella, C. Corbella, T. de los Arcos, A. von Keudell, A. Rousseau	<b>Probing adsorption and reactivity of nitrogen atoms on silica surface under plasma exposure</b>	P3.4.11
	C. Barakat, P. Gravejat, O. Guaitella, A. Rousseau	<b>Adsorbed and Gas Phase Study of the Oxidation of Isopropanol on TiO<sub>2</sub> Using Non Thermal Plasma for Surface Regeneration</b>	P3.4.12
5	S. Nguyen-Kuok, S. Fedorovich, V. Chinnov	<b>Determining electron temperature and density in RF plasma torches</b>	P3.5.1
	S. Fedorovich, Yu. Malakhov, S. Nguyen-Kuok	<b>A METHOD DIAGNOSTIC OF RF PLASMA TORCHES IN ULTRA-VIOLET RANGE</b>	P3.5.2
	I.M.F. Bragança, P.A.R. Rosa, F.M. Dias, L.L. Alves	<b>Experimental and modelling characterization of micro-EDM plasmas</b>	P3.5.3
	G.D. Stancu, D.A. Lacoste, C.O. Laux	<b>Investigations of carbon monoxide emission in methane flames stabilized by nanosecond pulsed discharges using Mid-IR QCLAS</b>	P3.5.4
	O. Levasseur, L. Stafford, N. Gherardi, and N. Naudé	<b>Diagnostic of atmospheric-pressure He discharges controlled by dielectric barriers in presence of porous wood samples</b>	P3.5.5
	D. Mendil, H. Lahmar, L. Boufendi, D. Ouadjaout, L. Henni, D. Louhibi, K. Henda	<b>Study of spacial evolution of EEDFs and plasma parameters in RF-CCP argon stochastic mode discharge by Langmuir probe</b>	P3.5.6
	M. Procházka, L. Blahová, F. Krčma, R. Příkryl	<b>In-situ monitoring of thin film depositon process using optical emission spectroscopy</b>	P3.5.7
	J. Klusoň, P. Kudrna and M. Tichý	<b>Gas flow velocity in the low pressure hollow cathode plasma jet sputtering system</b>	P3.5.8
	Arnaud Bultel, Vincent Morel	<b>Collisional-radiative modeling of a thermal Helium beam penetrating the edge plasma of a Tokamak</b>	P3.5.9
	J. Bredin, L. Popelier, V. Godyak, P. Chabert and A. Aanesland	<b>Evolution of electron temperature and negative ion density through a magnetic barrier</b>	P3.5.10
	M. Hübner, D. Marinov, O. Guaitella, N. Lang, A. Rousseau, J. Röpcke	<b>A temperature study of a low pressure, pulsed dc plasma using quantum cascade laser absorption spectroscopy (QCLAS)</b>	P3.5.11
	E. A. D. Carbone, S. Hübner, E. Iordanova, N. de Vries, M. Jimenez-Diaz, J. M. Palomares and J.J.A.M. van der Mullen	<b>Discrepancies between different electron Temperature diagnostics: probing the Electron Energy Distribution Function</b>	P3.5.12
	P. Dankov, Zh. Kiss'ovski	<b>Hairpin Probe Sensitivity for Determination of Plasma Density</b>	P3.5.13
	Lanoir Maaloul, Luc. Stafford, and Andranik Sarkissian	<b>Investigation of the role of sputtered particles on the plasma properties during rf-magnetron sputtering of Zn and ZnO targets</b>	P3.5.14
	J. Ferreira, L. Stafford, and R. Leonelli	<b>Optical emission spectroscopy of the flowing afterglow of a microwave N<sub>2</sub>/O<sub>2</sub> plasma used for the modification of GaN nanowires</b>	P3.5.15
	B. Sikimić, I. Stefanović, and J. Winter	<b>Measurement of ion fluxes in plasmas with nanoparticles</b>	P3.5.16
	Bouabdellah Rahmani, Belkacem Saghì, Torkia Smaili, Georges Zissis	<b>Experimental study of chlorine effect on krypton chlorine excilamp</b>	P3.5.17
	K. Teranishi, H. Kumegawa, H. Shimada, N. Shimomura and H. Itoh	<b>Measurement of ozone density distribution in a dielectric barrier discharge ozone generator using laser absorption method</b>	P3.5.18

	Eugenio Fasci, Olivier Guaitella and Antoine Rousseau	<b>Optical-Feedback Cavity-Enhanced Absorption spectroscopy detects ppt traces of Formaldehyde for the validation of air plasma treatment system</b>	P3.5.19
	A.A. Malinina, M.M. Guivan, L.L. Shimon	<b>Optical characteristics and parameters of DBD plasma based on multicomponent mixtures of mercury dibromide vapor with gases</b>	P3.5.20
	B. Horvath, T. Lamara	<b>Time-resolved broadband optical absorption spectroscopy of Cr metallic vapor using an LED lightsource</b>	P3.5.21
6	A. I. V. Schweigert, V. I. Demidov, I. D. Kaganovich	<b>Active control of electron energy distribution function in dc discharge using an auxiliary electrode</b>	P3.6.1
	B. Loncar, A. Vasic, S. Stankovic, G. Ilić	<b>The Influence of Dielectric Properties of Commercial Vacuum Interrupters</b>	P3.6.2
	B. Loncar, M. Vujisic, S. Stankovic, G. Ilić	<b>Influence of Gas Parameters on the Spark Gap Functioning</b>	P3.6.3
	M. Savić, M. Radmilović-Radjenović, M. Šuvakov, Z.Lj. Petrović	<b>First steps in obtaining Monte Carlo model of RF breakdown</b>	P3.6.5
	B. Rojas, A. Bekstein, J. de Urquijo	<b>A genetic algorithm to optimize the fitting of avalanches observed from a pulsed Townsend experiment</b>	P3.6.7
	F. J. Durán-Olivencia, F. Pontiga, C. Soria-Hoyo, A. Castellanos	<b>Multi-species simulation of Trichel pulses in oxygen</b>	P3.6.8
	M Atanasova, E A D Carbone, G Degrez and J J A M van der Mullen	<b>Effect of the driving frequency on an atmospheric pressure RF capacitively coupled plasma in Argon</b>	P3.6.9
	Arnaud Bultel, Julien Annaloro, Yacine Babou, Damien Lequang	<b>Modeling of the excitation non equilibrium of CO<sub>2</sub> plasma flows obtained in high enthalpy wind tunnels</b>	P3.6.10
	Alex Samarian	<b>Dust rotation in an electrodes discharge plasma with an axial magnetic field.</b>	P3.7.3
	P. Selyshchev	<b>Droplet growth in vapor under irradiation</b>	P3.7.4
P. G. C. Almeida, M. S. Benilov and M. J. Faria	<b>Self-organization as an intrinsic feature of DC glow microdischarges: predicting self-organization in different gases</b>	P3.7.6	
9	E.Felizardo, E. Tatarova, J. Henriques, F.M. Dias, S. Espinho, C.M. Ferreira and B. Gordiets	<b>UV Emission from Microwave Plasmas</b>	P3.9.1
	R. Rincon, H.V. Nguyen, N. Bonifaci, F Aitken, V. M. Atrazhev, K. van Haeften and J. Eloranta	<b>Cryoplasma in Helium at 4.5 K under different pressures.</b>	P3.9.2
	I. Sheykin, K. Dittmann, J. Meichsner, D. Loffhagen	<b>Fluid modeling of a ccrf discharge in oxygen</b>	P3.9.3
	A. Shishpanov, A. Meshchanov, Y. Ionikh	<b>The breakdown in a long non-shielded discharge tube in low-pressure nitrogen.</b>	P3.9.4
	Sudeep Bhattacharjee, Indranuj Dey, Krishanu Roy Chowdhury	<b>Observation of electron localization and asymmetric frequency sideband generation in bounded microwave-plasma interaction</b>	P3.9.5
	Shail Pandey and Sudeep Bhattacharjee	<b>Transition from interpulse plasmas to afterglows in a pulsed microwave discharge</b>	P3.9.6
	O. Leroy, B. Debord, P. Leprince, C. Boisse-Laporte, L.L Alves, R. Jamier, F. Gérôme, F. Benabid	<b>Generation of plasmas in 100 μm core diameter capillaries using a microwave excitation based on a surfatron</b>	P3.9.7
	Aurel SalabaS	<b>Plasma potential structure under the shower-head RF electrode</b>	P3.9.9
	D. Maletić, N. Puač, N. Selaković, S. Lazović, G. Malović, A. Đorđević and Z. Lj. Petrović	<b>Time-resolved images of plasma bullet for different electrode geometries</b>	P3.10.1
M. Sabo, Y. Okuyama, Š. Matejčik	<b>NO<sup>+</sup> generation and monoaromatic volatile organic compounds detection by IMS with positive corona discharge in wire to plate geometry</b>	P3.10.2	

	Julio Henriques, Elena Tatarova, Ana Dias, Francisco Dias, Carlos Ferreira and Claudia Luhrs	<b>Carbon nanostructures synthesized by a microwave plasma torch</b>	P3.10.3
	O. Nedybaliuk, V. Chernyak, E. Martysh, T. Lisitchenko, O. Aktan, S. Orlovska	<b>Plasma Assisted Combustion of Paraffin Mixture</b>	P3.10.4
10	O. Solomenko, O. Nedybaliuk, V. Chernyak, E. Martysh, T. Lisitchenko, V. Demchina and V. Kudryavzev	<b>Plasma reforming of ethanol/water mixture in the plasma-liquid system with reverse vortex air/CO<sub>2</sub> flow of “tornado” type with liquid electrode</b>	P3.10.5
	F. Pontiga, H. Moreno, K. Hadji, K. Yanallah, A. Castellanos	<b>Experimental study of positive corona discharge in mixtures of CO<sub>2</sub> and N<sub>2</sub></b>	P3.10.6
	I. Marinov, O. Guaitella, A. Rousseau and S. Starikovskaia	<b>Spectroscopic and shadowgraphic investigation of nanosecond underwater discharge</b>	P3.10.7
	A. S. Chiper and G. Popa	<b>Trapped gas-induced effects under pulsed DBD dynamics</b>	P3.10.8
	V. Sarron, E. Robert, D. Riès, S. Dozias, J.M. Povesle	<b>Transfer of Pulsed Atmospheric-pressure Plasma Stream generated by a plasma gun</b>	P3.10.9
	O. Guaitella, A. Bourdon, A. Rousseau	<b>Consequences of slightly different ground configurations on the propagation of ionisation waves inside capillary tubes</b>	P3.10.10
	T. Lapushkina, A. Erofeev, S. Poniaev	<b>Plasma Control of Supersonic Body Streamline</b>	P3.11.1
	T. Lapushkina, A. Erofeev, S. Poniaev	<b>Local MHD Influence on Shock Waves Position</b>	P3.11.2
	M. Erofeev, V. Skakun, D. Schitz, V. Tarasenko	<b>Optical characteristics of atmospheric pressure dielectric barrier discharge plasma in Ar flow</b>	P3.11.3
	M. D. Bowden, D. C. Barthaud, J. Kowal	<b>Application of microplasmas for satellite propulsion</b>	P3.11.4
	S. Reuter, J. Winter, A. Schmidt-Bleker, H. Tresp, M. U. Hammer, K.-D. Weltmann	<b>Controlling the Ambient Air Affected Reactive Species Composition in the Effluent of an Argon Plasma Jet</b>	P3.11.5
11	F. Sigeneger, J. Schäfer, R. Foest, K.-D. Weltmann, D. Loffhagen	<b>Study on the formation of thin films using an rf non-thermal plasma jet at atmospheric pressure</b>	P3.11.6
	A. Fredriksen, N. Gulbrandsen, W. Miloch, A. Hansen, E. Scime	<b>Plasma flows in expanding magnetic field: simulations, probe and Laser Induced Fluorescence (LIF) measurements</b>	P3.11.7
	E. Stamate and M. Salewski	<b>NO<sub>x</sub> reduction by ozone injection and direct plasma treatment</b>	P3.11.8
	Arnaud Bultel, Julien Annaloro, Vincent Morel, Pierre Omaly	<b>Relaxation of excited states calculated with CoRaM-Air, the CORIA's Collisional-Radiative model for air</b>	P3.11.9
	I. Prisyazhnevych, V. Chernyak, V. Yukhymenko	<b>Influence of the discharge current and gas flow rate on the non-equilibrium level of plasma of the transverse arc in air at atmospheric pressure</b>	P3.11.10
	Julien Annaloro, Arnaud Bultel and Pierre Omaly	<b>State-to-state modeling of a nitrogen plasma applied to the atmospheric entry problems</b>	P3.11.11
	Yan Xu, Jiyan Zhang	<b>Analysis of the measured iron opacity data</b>	P3.12.1
	J.Hoffman, T.Moscicki, W. Mróz, Z.Szymanski	<b>Laser-induced carbon plasma; modelling and experiment</b>	P3.12.2
	A. Bartnik, P. Wachulak, H. Fiedorowicz, R. Jarocki, J. Kostecki, M. Szczurek	<b>Photoionization of gases by EUV pulses from a laser-plasma source</b>	P3.12.3
	E. Nedanovska, D. Riley, T. Morgan, L. Hüwel, W. Graham	<b>Thomson scattering and emission spectroscopy of laser sparks induced in pure He and He-N<sub>2</sub> mixtures at 1atm</b>	P3.12.4

V. Burakov, N. Tarasenko, A. Butsen, N. Tarasenko	<b>Laser produced plasmas in liquids: spectroscopic characterization and application for fabrication of nanoparticles</b>	P3.12.6
C. Aragón, J. A. Aguilera, J. Manrique	<b>Estimation and control of self-absorption in laser induced breakdown spectroscopy. Application to Stark width measurements</b>	P3.12.7
Vincent Morel, Arnaud Bultel	<b>Determination of electron parameters in nascent aluminum laser-induced plasma by means of Thomson scattering</b>	P3.12.8
М. Горнаккова, J. Плавчан, Z. Grolmusová, J. Rakovský, M. Kociánová, J. Tóth, V. Porubčan, J. Svoreň and P. Veis	<b>Evaluation of minor and trace elements in meteorite “Košice“ by calibration-free laser induced breakdown spectroscopy</b>	P3.12.9
